Drug Discovery and Development Master

Duration

4 Sem. (120 ECTS; MSc)

Aims

- Research in drug discovery and development enables the identification of new drug targets and therapeutics.
- The programme operates on the interface between the fields of pharmaceutical chemistry and technology, pharmacology, biological sciences and in silico methods.
- Students will be provided with a programme of study tailored to their personal skills and interests, with flexibility being offered by the opportunity to undertake directed individual study courses. The students will be offered the opportunity to specialise according to their interests.

Graduates

It equips graduates to pursue careers in pharm. industries, in the public or non-governmental sectors or to continue to PhD level.

Ao. Univ. Prof. Mag. Dr. Michael Wirth, Studienprogrammleiter
